github.com/ulyavrubel
ulya.dev

Self-driven professional frontend developer working with React.js and Angular especially interested in building secure, robust, and scalable customer-facing services.

Technologies and Languages

- Languages: JavaScript, TypeScript, HTML, CSS/Sass
- Libraries and frameworks: React.js, Angular, RxJS, Node.js, Express, Material UI
- Technologies: RESTful API, Git, Firebase, gulp, Webpack, WebSocket, Babel, npm

Work Experience

Front-end Developer

3iTech

Aug 2020–Present

<https://3itech.ru/>

Moscow, Russia

- Maintain, develop and debug speech recognition analytical service using Angular, which allows users to upload files, search through millions of documents with advanced filters (Elasticsearch), create and edit interactive analytical tools such as charts (amCharts), dashboards, etc.
- Develop new version of the service with React and TypeScript
- Cooperate with back-end developers for Rest API integration
- Implement design from Figma with HTML and CSS/Sass using BEM class notation

Main accomplishments:

- Implemented the dashboard module where user can set dashboard size and grid, drag-and-drop and resize its elements
- Developed the service allowing client to monitor their network infrastructure with Zabbix data, including view and manage its hosts and services tree, get performance graphic representation
- Created modal dialog service (an analog of native prompt and confirm) which allowed to delete around 100 modal forms consistency of which were hard to maintain
- Initiated additional education through FrontendMasters platform for the team

Learning Front-end Development

2019–2020

<https://ulya.dev/>

Shenzhen, China

- In 2018 I moved to China because of my husband's work and started to learn front-end basics by myself with resources such as HarvardX, freeCodeCamp, FrontendMasters, Udemy, etc
- As a result made portfolio ulya.dev with projects using React, Firebase, Node.js, Express, MongoDB which allowed to find a job without professional experience, when moved back to Moscow

Senior Project Manager

PIK Group

2016–2018

Moscow, Russia

- Coordinated the team of 5 people managing sales strategy and pricing policy for 40 residential complexes.
- Participated in Business Intelligence system development (technical task, testing)

Strategy Consultant

Colliers International

2013–2016

Moscow, Russia

- Provided retail market analysis, feasibility studies and shopping mall concept development
- Communicated and collaborated with multi-disciplinary teams of consultants, brokers, architects and clients daily

Certifications and Courses

- **React and TypeScript**, FrontendMasters 2022
- **Fullstack Advanced React & GraphQL**, Wes Bos 2021
- **Data Structures and Algorithms**, Udemy 2021
- **JavaScript: The Advanced Concepts**, Udemy 2020
- **Responsive Web Design, JavaScript Algorithms and Data Structures, Frontend Libraries, APIs and Microservices**, freeCodeCamp 2019-2020
- **CS50's Introduction to Computer Science**, HarvardX 2019

Education

- **Master's Degree in Real Estate and Property Management**,
Diploma with honors, State University Of Management, Moscow 2005–2010

Projects

- **Personal portfolio** ulya.dev built with plain HTML, Sass, JavaScript
- **Blog post about a career change to tech** on dev.to. Wrote a popular article about how I found a junior front-end developer job in 2 weeks after a year of self-learning

Interests

- Tennis
- Electronic music
- Creative coding
